

Kanishka Katta

Data Engineer | AI/ML | QA AI Automation Specialist | Healthcare

+91 9618478709 | kanishkakrishna14@gmail.com | [Kanishka Katta | Portfolio](#) | [LinkedIn](#) | [github.com/KattaKanishka](#)

PROFESSIONAL SUMMARY

Data Engineer and QA AI Automation Specialist with 3.7+ years delivering enterprise-scale ETL/ELT pipelines and AI-driven test automation in the healthcare domain at Accenture. Expert in Azure Data Factory, Azure Databricks, PySpark, Delta Lake, and Medallion Architecture processing 500GB–1TB of CMS Medicare data with 99%+ SLA and 100% HIPAA compliance. Databricks Certified Generative AI Engineer with hands-on LLM evaluation pipeline and GenAI workflow experience across healthcare data platforms. Achieved 50% reduction in QA execution cycles through Functionize AI self-healing automation, Selenium, and Agile delivery, holding 9 certifications across Microsoft Azure, Google Cloud, and Databricks.

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Velagapudi Ramakrishna Siddhartha Engineering College

August 2018 – Jun 2022
First Class with Distinction

TECHNICAL SKILLS

Cloud & Data Platforms	Azure Data Factory (ADF), Azure Databricks, Delta Lake, Azure Synapse Analytics, Azure Monitor, Data Lakehouse, Data Transformation, Medallion Architecture, Streaming Pipelines
AI & GenAI	Databricks GenAI, LLM Evaluation Pipelines, Generative AI Data Prep, GenAI Pipelines, AI-Driven Automation, Functionize AI, MLOps, Pipeline Orchestration
Programming & Data Technologies	Python, PySpark, Apache Spark, SQL, Git/GitHub, CI/CD
Databases & ETL	SQL Server, PostgreSQL, SSMS, SSIS, PL/SQL, Informatica IIG, ETL/ELT Pipelines, Data Lineage, Data Quality, Reconciliation
QA & Test Automation	Selenium, Pytest, UFT, Functionize AI, Postman, Swagger, REST API Testing, Sauce Labs, API Automation
DevOps & Tools	Azure DevOps, Docker, Git/GitHub, CI/CD, Figma, Google Lighthouse, Snagit, ForgeRock, Agile/Scrum, HIPAA Compliance, Data Governance
Data Governance	HIPAA Compliance, Data Lineage, Data Quality, Audit Readiness, Metadata Management, Data Reconciliation, SLA Management, Healthcare Data Standards

CERTIFICATIONS

- AZ-900: Azure Microsoft Azure Fundamentals
- PL-300: Microsoft Power BI Data Analyst
- AI-900: Microsoft Azure AI Fundamentals
- PL-900: Microsoft Power Platform Fundamentals
- PL-400: Microsoft Power Platform Developer Associate
- Google Cloud Certified – Cloud Digital Leader
- Google Cloud Certified – Generative AI Leader
- Google Cloud Certified – Associate Cloud Engineer
- Databricks Certified Generative AI Engineer Associate

PROFESSIONAL EXPERIENCE

Accenture Pvt Ltd, Bengaluru	
Project B: Group Portal – Independence Health Group Inc – USA	Dec 2023 – Present
Role: QA AI Automation Specialist	Client Domain: Healthcare

Worked on a large-scale healthcare insurance member portal enabling 10,000+ users to manage claims, benefits, payments, provider search, authentication, and wellness services across web and mobile platforms. Responsible for end-to-end quality assurance including AI-driven automation, API validation, database testing, UI/UX validation, security testing, and cross-browser compatibility within Agile delivery environments.

Key Responsibilities & Achievements:

- Designed and executed AI-driven automated validation workflows using Functionize self-healing automation, reducing QA execution cycles by 50% through workflow modularization, parameterization, and reusable automation design patterns.
- Built modular, parameterized automation frameworks supporting multiple environments, datasets, user roles, and feature configurations enabling true end-to-end validation via chained workflows with runtime session tokens and transaction IDs.
- Delivered comprehensive Functional, Smoke, Integration, Regression, and E2E test coverage across enterprise healthcare web and mobile platforms within Agile sprint cycles.

- Designed scalable automation components covering 100+ newly introduced features per sprint, reducing onboarding time for new test scenarios by 50%
- Implemented chained automation workflows by capturing and reusing runtime variables including session tokens, transaction IDs, and dynamic user data for true end-to-end validation.
- Engineered comprehensive API validation using Postman and Swagger covering GET/POST/PUT requests, response payloads, and backend integrations with automated database cross-checks across 15+ mid-tier services.
- Executed backend SQL validation using SSMS ensuring UI-to-database consistency and data integrity across 15+ integrated application modules.
- Validated security workflows including Single Sign-On (SSO), Multi-Factor Authentication (MFA), session handling, and authorization flows using ForgeRock.
- Executed cross-browser and cross-platform testing using Sauce Labs across Chrome, Firefox, Edge, Safari, desktop, mobile, and tablet — ensuring consistent UX across all environments
- Audited UI/UX implementation against Figma specifications and validated accessibility and SEO compliance using Google Lighthouse.
- Diagnosed and resolved automation failures by analyzing execution logs, DOM snapshots, and screen recordings — reducing suite flakiness and improving release readiness.
- Managed end-to-end defect lifecycle for 200+ issues in Azure DevOps — providing high-fidelity reproduction steps, root-cause analysis, and visual evidence via Snagit to accelerate developer resolution times.
- Collaborated with cross-functional Agile teams across sprint planning, test strategy design, defect triage, and release sign-off — ensuring quality gates were met across every delivery cycle.

Skills, Tools & Technologies: *SQL, SSMS, Selenium, Postman, Swagger, Functionize AI, UFT, Sauce Labs, Azure DevOps, Figma, Google Lighthouse, Snagit, ForgeRock, Git/GitHub*

Accenture Pvt Ltd, Bengaluru	
Project A: AmeriHealth Medicare (US) – CMS Medicare Fee Schedule	Jan 2023 –Nov 2023
Role: AI Data Engineer	Client Domain: Healthcare

Developed metadata-driven cloud pipelines processing 500GB–1TB of CMS Medicare fee schedule data to replace manual spreadsheet-based workflows using ADF and Databricks. Designed a multi-layer Medallion Architecture, implemented robust SQL and PySpark validations with automated GenAI-ready orchestration patterns, and maintained strict SLA adherence with real-time observability via Azure Monitor.

Key Responsibilities & Achievements:

- Architected and maintained 20+ Azure Data Factory (ADF) pipelines for ingestion, transformation, and processing of multi-state CMS Medicare fee schedule data across 500GB–1TB, ensuring 100% accuracy and full HIPAA compliance.
- Implemented complex ETL/ELT data transformations and business rules using PySpark and SQL across 5+ US state Medicare fee schedules, meeting all operational and regulatory benchmarks.
- Designed and validated a 6-layer Medallion Architecture (RAW → Standardized → Bronze → Silver → Gold → Consumption) confirming structured data flow, lineage, data quality, and governance across all pipeline layers.
- Monitored and optimized 20+ pipelines using Azure Monitor and Azure Synapse Analytics, maintaining 99%+ SLA reliability by identifying and resolving execution issues proactively.
- Engineered pipeline validation automation scripts that reduced manual verification effort by 40%, directly accelerating CI/CD-aligned release cycles.
- Reduced pipeline failure resolution time by implementing automated alert thresholds in Azure Monitor — cutting incident response time across all 20+ production data pipelines.
- Performed data quality, reconciliation, and exception testing to ensure adherence to business logic, transformation accuracy, and HIPAA compliance standards.
- Governed metadata and data lineage using Informatica IIG — supporting audit readiness, traceability, and HIPAA compliance across all pipeline layers.

Skills, Tools & Technologies: *Azure Data Factory (ADF), Azure Databricks, Delta Lake, PySpark, Apache Spark, Azure Synapse Analytics, SQL Server, Azure Monitor, Informatica IIG, Git/GitHub, SQL, Data Lakehouse, CI/CD*
